

## Tri Lite Loading Dock Accessories

Tri Lite offers accessories that expand the applications, functionality and performance of Tri Lite’s Dock Light Heads and Arms.

### Adjustable Tripod (TRIPOD)

- Height adjustable from 40-72 inches
- Legs open to 42 inch diameter for stability, includes rubber non-skid feet
- Folded height is 40 inches for easy storage
- Lightweight tubular steel construction with durable powder-coated finish
- Provided with removable T-bar and adaptable electrical cords enabling use with one or two light fixtures
- Can be used with Tri Lite Dock Light heads, warning lights and/or signals

### DLFAN Kit (DLFAN)

High Capacity 3-speed fan provides air circulation and cooling throughout the trailer. 18” fan rated for 3000 cfm. Each fan is supplied with a “Y” cord that enables the fan to be used separately or in conjunction with all Tri Lite dock light heads.

### Magnetic Mounting Kit (DLMAG)

A Magnetic Mounting Kit can be used with all Tri Lite light heads except HDLED units. Our durable magnet kit holds to most steel surfaces. Ideal for temporary applications as task lighting. Comes with six foot power cord.

### Wire Guards (DLWG)

Wire guards are available for Polycarbonate, Metal and Gooseneck Light Heads. Wire guards, when used with recommended bulbs, can prevent fires. Guards also reduce chances of objects penetrating light head face and damaging the bulb. An optional security kit is available for use with polycarbonate light heads to deter unauthorized removal of bulb.

### Heavy Duty Arm Bracket (DLWB)

Optional heavy duty mounting bracket. Provides additional support. Should be considered when mounting longer (90”+) arms and when fan units are added.

Part #	Type
TRIPOD	- Adjustable Tripod
DLFAN	- DLFAN Kit
DLMAG	- Magnetic Mounting Kit
DLWG6	- Wire Guard for Metal Head
DLWG8-P	- Wire Guard for Polycarbonate
DLWB	- Heavy Duty Arm Bracket
